Mumbai 401105 DOB: 8th July 1994

---

- **Objective**

To obtain a position that will enable me to use my technical skills, enhance my knowledge and ability to work well with people.

- **Work Experience**

- **Software engineer - Tacto Infomedia Pvt. Ltd.** May 2016 – Present.

Worked with the team to create and implement the new features in the app and bug fixes. Optimized data fetching and insertion into the database using retrofit and database transaction. Implementing android's best practices and designing pattern. Enhancing the user experience by creating smooth and robust application.

- **Projects**

- **Beats - Music Player**

I created this music player when I was in the college as a college project and this was the starting point for me in the android development. Now It has more than 250k downloads on playstore, later I made it open source.

- **Bell – Ringtone Maker**

This is an android open source project which cuts the audio file and lets them save or set them as your phone's ringtone.

- **Technical Skills**

- **Languages / Frameworks:** HTML5 (Intermediate), Python (Beginner), Core java and android (Expert).
- **Tools:** Photoshop, Sublime text editor, Android studio, Pycharm.
- **Other area of interest:** Data structure and algorithms, Operating systems, Software engineering.

- **Academic Qualifications**

- BSc. in Computer | Mumbai University | July 2016
- HSC | Divine Image Junior College | Mar 2012
- SSC | Divine Hymn High School | June 2010

- **Hobbies**

Programming, Computer gaming, Reading blogs and answers on Quora.
